DIISOCYANATE UNDER REACH

REACH is the European Regulation on the Registration, Evaluation, Authorisation and Restriction of Chemicals. It came into force in 2007 and replaced the previous regulatory framework for chemicals in the EU.

On 4 February 2020, the REACH Committee voted in favour of the European Commission's proposal for a REACH restriction on **diisocyanates**. The restriction was published on 4 August 2020 and will apply from **24 August 2023** after a transition period of 3 years.

Diisocyanates are chemical substances that are used in many different ways. In particular, various polyurethane products are made from them. These are, for example:

- flexible or rigid foams
- adhesives
- lacquers
- coatings
- sealing compounds
- elastomers

Training note on the packaging

Training obligation for all users

24.08.2023

What does this mean for the user?

Your employees must be trained and certified in the safe handling of products containing diisocyanates by **24 August 2023**. This applies to all commercial and industrial users of products with a total concentration of monomeric diisocyanate of $\geq 0.1\%$. Such products have been labelled with a notice indicating the need for training since 24 February 2022.
